

Subject: Cyber Security Advisory – Critical vulnerabilities in Paper Cut Print Management Software (Advisory No. 22)

Reportedly, Paper Cut Print Management Software has released patches to fix 2x critical vulnerabilities being exploited by threat actors; CVE-2023-27350 and CVE-2023-27351. The vulnerabilities entail unauthorized Remote Code Execution (RCE) and lateral movement. All Paper Cut NG and MF products are affected by these vulnerabilities.

2. Administrators and users are advised to update to Paper Cut Software MF and NG latest versions (20.1.7, 21.2.11 and 22.0.9) or above.
