

Subject: **Cyber Security Advisory – Android June 2024 Patches/Updates (Advisory No. 12)**

Introduction. Recently, Google has rolled out Android security updates for June, 2024 via Google Play protect service, fixing 37 vulnerabilities. These updates are floated in the form of two security patch levels (SPLs) i.e. 2024-06-01 (SPL) to resolve 19 flaws in the framework and system components and 2024-06-05 (SPL) to addresses 18 flaws in Kernel, Imagination Technologies, Arm, MediaTek and Qualcomm components. Additionally, WearOS received patches for 3 vulnerabilities in 2024-06-01 (SPL), while Android AutomotiveOS (AAOS) includes the 2024-06-05 (SPL) fixes.

2. Above in view, all Android OS users are advised to enable Google Play protect service to receive notifications for the latest updates and ensure that the devices are running the latest security patch level. Also, devices running Android OS are advised to update to latest versions (11 or above).
